At Mind The Value we believe in making a positive difference by creating unique opportunities for unique talents because above all we believe in People. Join our fast-paced team of dedicated professionals to gain exciting experience of growing, developing, and thriving together.

Job Requirements:

- You will be included in a young and dynamic work team and you will be directly involved in the management and development of projects related to Industry 4.0
- You will have the opportunity to work on topics of high technological and innovative content, to have a good overview of the projects on which you will be included and to enhance your skills
- Strong interest in Business Processes and Technology
- Speak and write English fluently
- The knowledge of Italian is not mandatory, but it will be considered a plus
- Excellent knowledge of MS Office
- Knowledge of SAP is an asset
- Entrepreneurial mindset
- Desire to become a part of a growing environment
- Love to find and to share innovative solutions
- Be a team player
- Be proactive, and every day for you is a new challenge and a new opportunity
- Willingness and predisposition to work in a team with adherence to deadlines

You will work in an international environment and in teams from all over the world. According to your university degree you will be assigned to one of the following Business Units: Financial Performance Management, Supply Chain Planning, Procure To Pay, Order To Cash, Sales and Marketing, Cross-Process.

Essential Responsibilities:

- Collecting and analysing business requirements to define and implement operating models
- Designing models, processes, and solutions
- Drafting of functional and technical analysis of end-to-end processes
- Internal tests and support/training to final users
- Supporting the implementation of Enterprise Resource Planning (ERP) solutions or other technological platforms from model and process design to implementation

- Supporting new projects' sales process (preparing sales campaigns on innovative themes, preparing partnership proposals, RFP, etc.) through the identification of areas with greater digitisation potential
- Working on digital transformation and business process re-engineering projects

Let's take the path together!
